DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Duncan et al, US006238277B1 in view of Godfrey et al, 4,513,469. '277 discloses the claimed invention, except for a control unit being operatively connected via a radio communication unit to an operating device for remote control of the machine. '469, in a similar device, teaches providing a radio control to control the various functions of the device. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided '277 with the radio control of '469, column 2, lines 8-12, to allow the operator to control the tool from a remote location.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar radio controlled floor treating tools are cited of interest, including vacuum cleaners and lawn mowers.
